- From the range of \$0 to \$2.5 millions, women can receive higher incomes similar to men.
- Less women make more than \$2.5 millions when compared to men

Men, on average, make and borrow more money than women; however, women, on average, have a higher credit to income ratio.

- Women are more likely to receive higher education than men
- Men are more likely to incomplete higher education than women

Despite women are more likely to complete higher education, women are less likely to receive leadership roles such as manager; however, women are more likely to become core staffs.
